Rengo Belt Corsets

Have made such a remarkable impression upon our trade and have sold so quickly to those who have taken the trouble to examine them, that it is almost impossible to keep a stock of them on hand. We have just succeeded in getting a complete shipment of this famous corset, and will place it on sale to-morrow. We attribute the tremendous success of this corset to the RENGU BELT feature of it, which actually accomplishes the reduction of hips and produces beautifully moulded lines in the back and below the waist. RENGU BELT is a new invention which develops wonderful grace in the medium and large figure; which does not make style at the sacrifice of comfort; and which does not consist of trapping or lacing of any sort. It is a part of the corset itself, shaped to perfect hips and back.

RENGU BELT CORSETS also have other special advantages—they are boned throughout with double watch-spring steel, which is rustproof. The boning is perfectly covered before it is inserted into the corset, and is guaranteed not to break or punch through.

An Expert Corsetiere in attendance to fit these models.
